

As a citizen and an educator, I implore you to listen to the will of the people expressed through the unprecedented public comment you have received over the past few weeks regarding the proposed changes of FCC regulations governing media ownership. This is a democracy whose power derives from the citizens who elect their

leaders. A one-month extension of time plus adequate public hearings are clearly in order regarding the 'fourth branch of government' so vital to our system of checks and balances.1

Thank You1
